

Seed Distribution

This year sees a changing of the guard. The Society would like to thank Roy Skidmore for his many years ensuring that members had access to cyclamen seeds, generously donated by members, including seeds from CSE plants.

Roy will be replaced by Jo Hynes, National Collection Holder for cyclamen and holder of the Jan Bravenboer collection, for seed donations and packing. Arthur Nicholls will handle despatch of seed orders. Details are shown on the Application/Donation form.

For the 2019 distribution we would kindly ask all members to consider donating seed, no matter how small an amount, especially the rarities (*Cyclamen colchicum*, *C. parviflorum*, *C. pseudibericum* 'Roseum', *C. purpurascens* f. *album* and any white forms of *C. alpinum*, *C. coum* and *C. repandum*).

For 2019 we will continue to have a single distribution. The December *Journal* may offer an opportunity to apply directly to Arthur for any surplus seed available at the end of the main distribution.

Free postage to overseas members for all their seed orders and free postage to UK members for their 'free allocation only' orders will continue for 2019.

The Nagoya Protocol

Wild-collected seed does not have a code on the General Seed List. The Cyclamen Society assumes that all wild-collected seed that might be offered as a 'special' has been collected in accordance with the laws of the source countries and that its distribution is allowed under the terms of any permits to collect the seed. Genetic material collected from the wild since 12 October 2014 is covered by the Nagoya protocol, which is legally binding in the EU, including the UK. For material from signatory countries, unless there is written consent from

the country of origin, 'utilisation' is not permitted. This includes development of new named cultivars and hybrids. Cultivation privately or commercially is permitted. Unless explicitly stated otherwise, you should not assume that seeds in our list have consent for utilisation as described above.

Donation of wild-collected Seed

The reputation of the Cyclamen Society is at risk if we offer seed that has been collected illegally or does not have permission for distribution. This could do harm to future attempts by people who want to collect legitimately. The Society is not able to check every seed donation, so please do not donate seed that would put our reputation at risk. Please also retain documentation giving any relevant permission for as long as possible.

Donors

Fresh seed of all species/varieties is needed, especially rarities (see above). Each variety should be packed in a separate packet and labelled with the species name, varietal epithet and 2019 code if applicable. Please ensure that all seed is completely dry, clean and free from dried seed pod material. If you are sending seed of *C. persicum*, include the flower colour of the parent plant.

All donations are to be sent to Jo Hynes (address on application form). Please ensure donations reach Jo by 31 August 2019 where possible. We are happy to receive donations after this date but would appreciate donors contacting Jo to let her know that donations will be later.

Applying for seed

Only applications on the official form will be accepted. Order forms should be sent to Arthur Nicholls. Please include your name and Society membership number. Your membership number can be found on your membership card and on your

Journal address label. Orders will be handled strictly in the order received, with overseas orders adjusted by five days to allow for the longer *Journal* delivery time.

Distribution will start in mid-October and will take four to six weeks so please do not enquire about missing seeds until December. **Please list adequate alternatives** which should include different varieties from those already ordered. Where a variety is in short supply, donors will be given priority. No member will receive more than one packet of any rare form or more than five packets of any variety. No non-donor will receive all rarities. The last date for the receipt of all applications (UK and Overseas) is 31 August 2019.

Payment for seed

When an order has been prepared, members who have ticked the PayPal or BACS boxes on the order form will be sent an invoice. Once payment has been received, the order will be despatched. PayPal is the preferred method of payment but, if it cannot be used, UK members may make a BACS payment directly to the Society's bank account, sort code 30-98-90, account number 17604660, using the reference **SEED plus their membership number**.

For members who have sent limit cheques, the amount (including any postal charges) will be entered and the cheque banked. The order will then be despatched and the member advised of the amount taken.

For members who send cash, the amount of seed will be adjusted to the value of the payment, substituting if necessary.

Overseas members

All US members must apply for a small seed lot import licence from the USDA. More information on this can be found at: www.aphis.usda.gov/import_export/plants/plant_imports/smalllots_seed.shtml

Overseas members should use PayPal unless they have a UK bank account, in which case they may use the 'limit cheque' method.

Please don't send cash unless there is absolutely no alternative. Cash is acceptable in sterling, euros or US dollars and is sent entirely at the sender's risk – proof of posting will not be accepted by the Society as proof of receipt.

CSE, Peter Moore and Jan Bravenboer seed

Seed from plants collected on Society field studies (each with a 'CSE' number), from Peter Moore's stock plants (each with a 'PM' number) and from the Jan Bravenboer collection (each with a 'JB' number) will be listed separately.

The list will be available on the Society website www.cyclamen.org, or by emailing seedorders@cyclamen.org.

A special web page illustrating many of the parents from the listed collections will be made available on the Society website. UK members without access to the internet who want this list (available end September) should send a SAE to Arthur Nicholls, Little Orchard, Church Road, West Kingsdown, Kent, TN15 6LG. Overseas members without access to the internet just send a self-adhesive label.

General Seed List

(packets will be numbered only, so keep this list)

1	<i>africanum</i>	*43	<i>graecum graecum</i>	86	<i>mirabile</i> ex CSE
2	<i>alpinum</i>	*44	<i>graecum candicum</i>	87	<i>mirabile</i> 'Tilebarn Anne'
3	<i>alpinum</i> white fl	45	<i>graecum</i>	88	<i>mirabile</i> 'Tilebarn Jan'
4	<i>alpinum</i> ex CSE	46	<i>graecum album</i>	89	<i>mirabile</i> 'Tilebarn Nicholas'
5	<i>balearicum</i>	47	<i>graecum</i> ex CSE	90	<i>parviflorum</i>
6	<i>cilicium</i>	48	<i>graecum</i> pewter/silver leaf	91	<i>persicum</i> pink fl
7	<i>cilicium album</i>	49	<i>graecum</i> 'Glyfada'	92	<i>persicum</i> white fl
8	<i>cilicium</i> ex CSE	50	<i>graecum</i> 'Rhodopou'	93	<i>persicum</i> ex CSE
9	<i>cilicium</i> 'Bowles Variety'	51	<i>hederifolium</i> dark purple fl	94	<i>persicum</i> pure white, no red nose
10	<i>colchicum</i>	52	<i>hederifolium</i> pink fl	95	<i>persicum</i> 'Tilebarn Karpathos'
11	<i>confusum</i>	53	<i>hederifolium</i> white fl	96	<i>persicum</i> pewter/silver leaf
